[OAS 88 Klaus Heinemann - The Orb Project](#)

By jeffrey

Jeffrey interviews physicist and co-author [Klaus Heinemann](#) of [The Orb Project](#), which explores the phenomenal manifestation of light orbs that are appearing all over the world to thousands of individuals from all imaginable backgrounds.

Stunning digital photographs of orbs of various shapes, sizes, quantities, and colors that beautifully float, glide, and hover are extensively captured and explored by [Miceal Ledwith](#) and [Klaus Heinemann](#) in this ground breaking new book. The authors additionally delve into communication with orbs, seeing orbs with the naked eye, and what their existence means to our lives and how that informs our place in the cosmos.

In addition the authors are releasing a new film called [Orbs: The Veil is Lifting](#) which features extensive interviews and film footage of this magical phenomenon.

Dr. Heinemann holds a doctorate in [experimental physics](#) and has worked for many years in [materials science research](#) at [NASA](#), [UCLA](#), and as a research professor at [Stanford University](#). He is founder and chairman of a corporation that performs scientific research in [computational fluid dynamics](#), materials development, and [nanotechnology](#) under contracts from NASA.

For several decades Dr. Heinemann has worked on mending the commonly perceived rift between science and spirituality and lectures extensively on expanding perception and consciousness.

Listen to a fascinating interview with a high profile leader in the continual harmonization of science and consciousness.

Music is provided by [Podsafe Music Network](#) artist [Robert Wiley](#) and is called Winter Solstice
